
Essentials of our policy concerning Safety, Health & Environment

The management and all employees of Stork Turbo Service GmbH see work safety, health and environmental consciousness as an important company target.

In all our actions we always strive to prevent accidents, injuries, occupational diseases, work disabilities, as well as to avoid damages to the environment and damages to property, to exclude safety risks for employees and all others.

All necessary efforts for reaching these targets will be given high priority in our company.

We are convinced of the fact that every incident setting industrial safety, the environment or the health of people at risk is avoidable.

With the active participation of each employee we strive to exclude any material or immaterial damage and constantly improve the usage of all existing resources in our company to reach this goal.

Safety and pollution-free working methods, protection of personal health, social authority and technical expertise are not only just as important as the quality of work, but they are indivisibly connected with it.

Work safety is the task of the management, high-level personnel and all employees. All work equally consciously in the daily application of industrial safety measures. Each superior acts as a role model and thus directly responsible for:

- the safety and health of all employees
- the safety conscious behavior of all employees
- the safe condition of all work media
- the correct handling of tools and materials as intended
- the selection and the usage of proper personal protection equipment (PPE)
- the protection of the environment

The management makes sure that the necessary means to realize this are available to the responsible persons.

Every employee is responsible for:

- own safety and health
- the safe accomplishment of dedicated tasks
- the consistent carrying of personal protection equipment
- the reporting of unsafe events or mistakes

On the basis of the industrial democracy act the work council is included in all cases concerning planning and introducing industrial safety measures.

Obligation of all employees

Each employee is obligated to direct the necessary caution and care to all actions in the interest of health and safety, own and from thirds.
